

Web-application Screenshot

Date	19 November 2022
Team ID	PNT2022TMID36407
Project Name	Retail Store Stock Inventory Analytics.

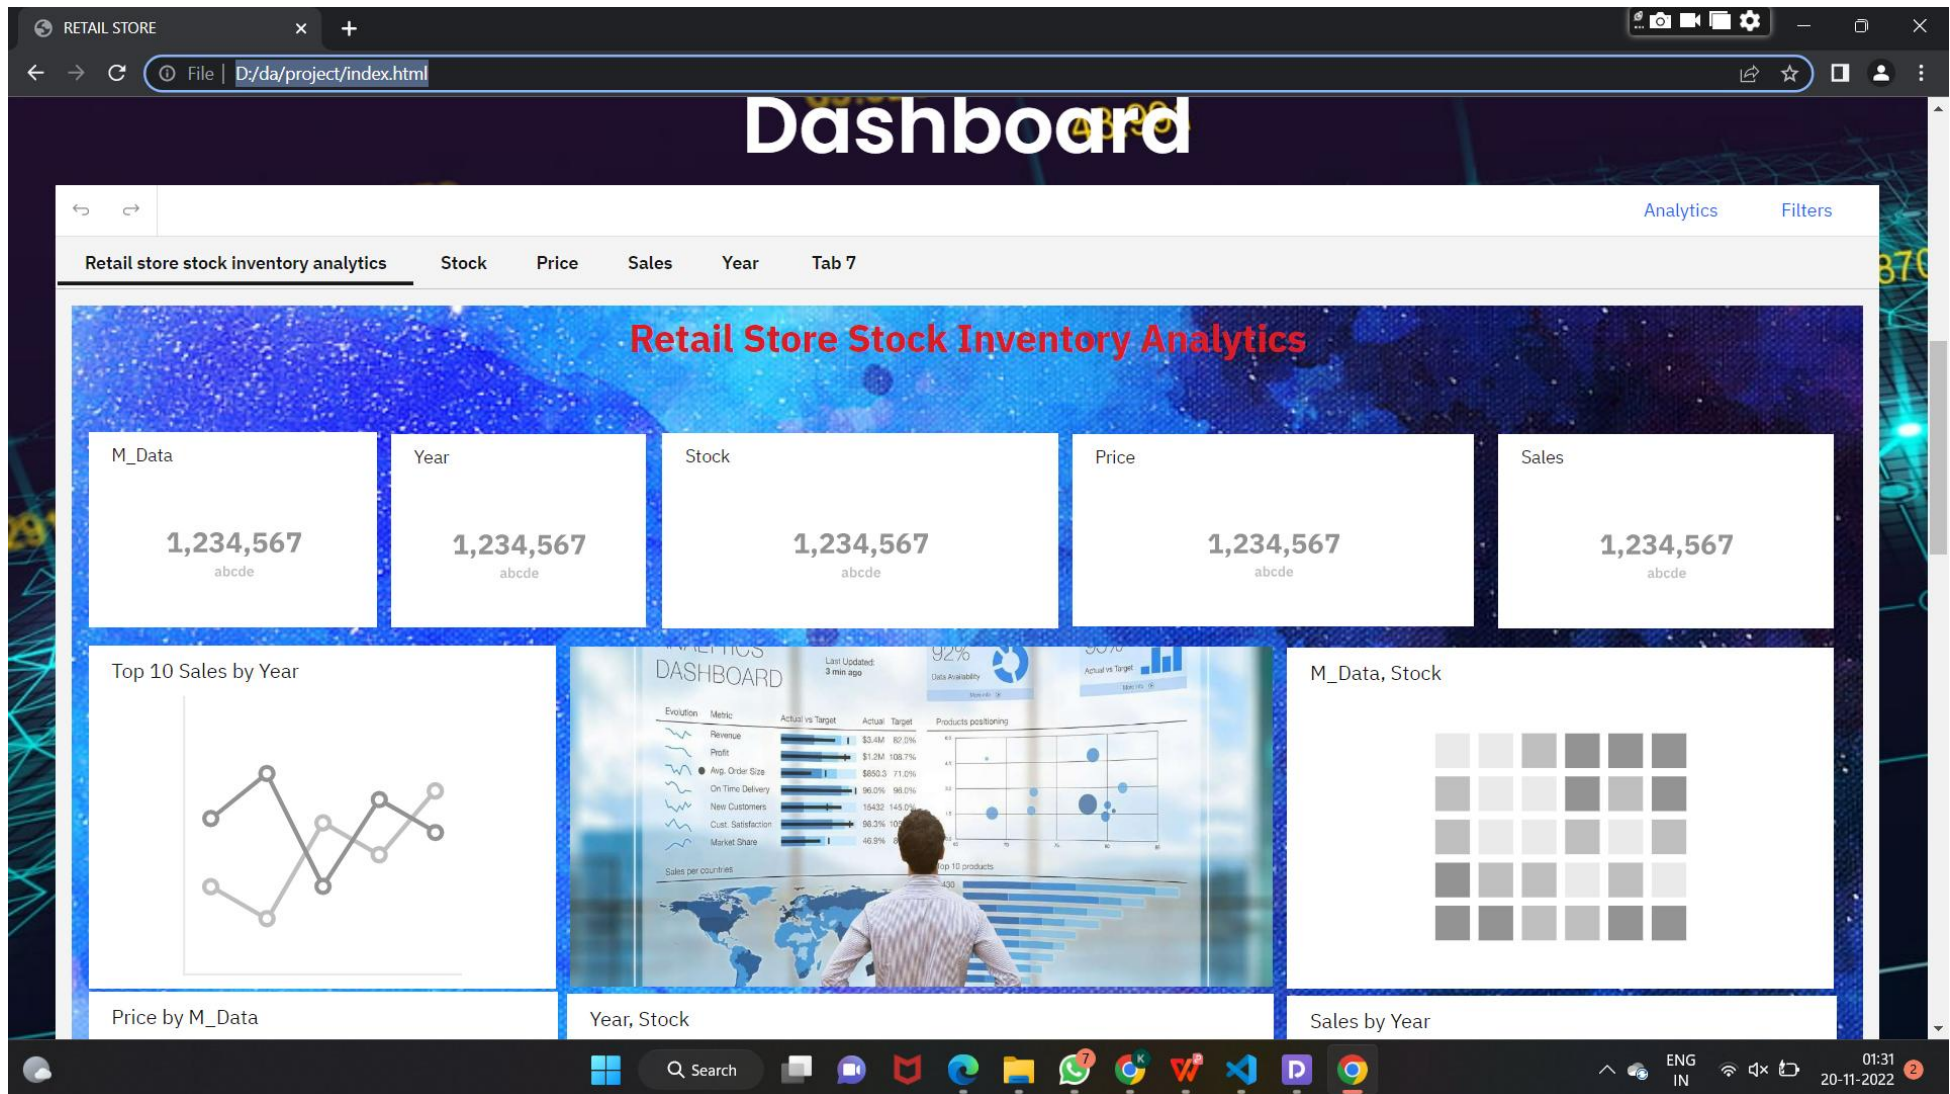

The screenshot shows a web browser window displaying the Cognos web application. The browser's address bar shows the URL <https://master-kishore.github.io/RSSIA/index.html>. The application's header includes the Cognos logo and navigation links: Home, Visualization, Report, Team, and About. The main content area features a large, stylized graphic with the title "Retail Store Stock Inventory Analytics" in white text. Below the title, there is a paragraph explaining the process: "Retail store stock inventory analytics is a process used to check the stock and percentage the available stock on the time. In practice, effective retail store stock results in lower costs and a better understanding of sales patterns. Retail store stock inventory analytics tools and methods give retailers more information with which to run their dataset. By managing inventory, retailers meet customer demand without running out of stock or carrying excess supply." The background of the main content area is a dark blue grid with various data visualization elements, including bar charts, line graphs, and circular progress indicators showing percentages like 60%, 20%, 14%, and 70%. The browser's taskbar at the bottom shows the Windows Start button, a search bar, and several open applications including Microsoft Edge, File Explorer, and various communication tools.
